PROFESSIONAL EXPERIENCE

IPDC Finance PLC, Gulshan, Dhaka

03/2026 - Present

Full Stack Developer

- Rebuilt IPDC Finance's large-scale corporate website from scratch, modernizing the legacy Laravel/Nuxt platform to Next.js.
- Developed enterprise Admin Portal modules with responsive interfaces, reusable components, and REST API integrations.
- Engineered Card Management System (CMS) features including bulk processing, QR workflows, image uploads, card lifecycle management, and exports.
- Built and optimized the Dedupe Portal with single/bulk search, validation, asynchronous polling, and CSV processing.
- Developed RM Visit and PI-HR reporting features with advanced filtering, pagination, and PDF/CSV/Excel exports.
- Managed UAT deployment, Linux server configuration, SEO, JSON-LD structured data, and production optimization across English and Bangla pages.
- Environment: Next.js, React, TypeScript, JavaScript, Tailwind CSS, Material UI, REST APIs, SQL, Laravel, Linux, GitLab, SEO, JSON-LD

Capita Group, Banani, Dhaka

05/2025 - 02/2026

Full Stack Developer

- Developed an HR Management System for attendance, leave, approvals, and employee workflows.
- Built a Billing Management System for rent, electricity, internet, and other property-related invoices.
- Rebuilt group websites and CMS platforms, replacing vendor-developed solutions with in-house applications.
- Introduced Coolify-based infrastructure for application deployment, server management, and CI/CD.
- Improved UI/UX, responsiveness, performance, and maintainability across multiple applications.
- Environment: Next.js, React, TypeScript, Node.js, Express.js, PostgreSQL, Prisma, REST APIs, JWT, TanStack Query, Tailwind CSS, Docker, Coolify, Nginx, Linux, CI/CD

Full Stack Developer

- Delivered full-stack web and mobile applications for local and international clients.
- Developed 5+ e-commerce platforms with core commerce and admin workflows.
- Built and presented separate prototype applications to the Bangladesh Tourism Ministry and Bangladesh Police as part of business proposals.
- Developed an NGO project management platform with cloud, database, and deployment features.
- Built diverse client applications, including an online book library and donation platform, and supported AWS/on-premise deployments.
- Environment: React, Next.js, React Native, JavaScript, Node.js, Express.js, PostgreSQL, MongoDB, Prisma, REST APIs, GraphQL, Tailwind CSS, JWT, AWS (EC2, S3, RDS), Docker, Nginx, Linux, CI/CD

The Biz House Ltd, Baridhara DOHS, Dhaka

03/2021 - 01/2022

IT Consultant (Part-Time)

- Managed and maintained company websites, web applications, hosting, and server environments.
- Coordinated with software and IT vendors for solution evaluation, implementation, upgrades, and technical support.
- Supported business teams in identifying requirements and selecting suitable technology solutions.
- Handled application deployment, troubleshooting, domain/hosting configuration, and day-to-day technical operations.
- Assisted with the maintenance and improvement of internal and third-party business applications.
- Environment: Linux, VPS, Nginx, Apache, MySQL, cPanel, DNS, SSL/TLS, Git
